SUMMARY

I've been developing for the Internet for 6 years. I've designed, coded, managed and developed in many platforms, for many companies, with many programs and programing languages. I'm proficient with: HTML, CSS, PHP, Javascript, Ajax, Express, and Node.js, GIT among other techs. I can build a custom site from a framework and create complex views; I've also built shopping carts with Prestashop. I've been catching up on Mobile Software Developing and Facebook Apps and look forward to developing more projects with these technologies. I love the MEAN combo.
